

SCOTWASTE/Stewart Melrose (Bathgate) Ltd

Environmental Policy

SCOTWASTE/Stewart Melrose (Bathgate) Ltd are committed to setting high standards of Waste Management and ELV Disposal; complying with legal and other industry requirements; and helping to ensure safe and environmentally acceptable working practices for all of our activities. Our aim is to continually improve and reduce any negative impacts of our business on the environment, including prevention of pollution.

The principals of this Environmental Policy are applicable to both SCOTWASTE and Stewart Melrose (Bathgate) Ltd to which both operating divisions are required to comply.

Implementation of this policy is a line management responsibility within each division and requires participation of all employees, suppliers and contractors.

Our Aims

- To reduce waste to landfill through segregating waste for recycling.
- To re-use vehicle spares where possible through our parts-sales division.
- To minimise waste generated from our activities and recycle whenever and whatever we can from those activities.
- To use suppliers who genuinely show the same concern for the environment that we do and wherever possible, purchase from them products derived from sustainable resources. At the very least, we aim to purchase products that can be recycled at the end of their usefulness.
- To reduce energy consumption and reduce emissions from our machinery and vehicles.
- To reduce our consumption of raw materials during the course of our business.
- To educate our workforce through good practice procedures in the expectancy that they will take our environmental values and pass them on to their friends and family out-with the workplace.
- To make SCOTWASTE/Stewart Melrose (Bathgate) Ltd an industry leader in positive environmental achievement.

Our Methods

- Implementing a monitoring system which will effectively measure our environmental impact. Having periodic reviews to monitor and record our progress.
- Actively monitoring our suppliers and assure ourselves that their activities are in line with our Environmental Policy.
- Educating our workforce to increase their environmental awareness and adopt exemplary good practice. We will do this through inclusion and training.
- Including methods in our day to day operational procedures which meet current environmental legislation and industry good practice.
- Consistently looking for ways to improve our environmental impact and to integrate our aims more into our strategic planning process thereby seeking ongoing improvement.

This policy will be communicated to all employees, customers, subcontractors and suppliers and is available to any interested parties.
